## QVF Updates

1. Ballot alias name field has increased to allow up to 10 characters

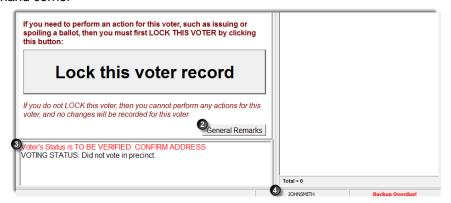

2. All modules will now allow for barcode scanning of the driver's license number or the Voter ID number
3. Forms generated with a barcode will now use the Voter ID number versus the driver's license number

4. Petition module allows cities to choose a ward for candidates

5. Petition module shows the voter's precinct and ward number in the confirm petition signature screen

6. Default changed to Combined Precinct in the EPB Export screen

## EPB Updates

1. A new "Voter Remarks" button on the ballot issuance screen (Remarks will print in the Remarks Report)

2. Renamed the original remarks button "General Remarks"
3. Statuses of V & CH now read "To be verified" and "Challenged"
4. A display of the username currently logged into the system in the lower right hand corner

5. "You are about to issue a Provisional Affidavit/Envelope Ballot" language is now displayed in red

6. Ability to save the Voter List in a .csv file for export

7. Created an Activity Log to track activity by user

8. Ballots can no longer be issued to a voter who had a ballot marked rejected
